REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the prior art references teaches or fairly suggests the combination of *decontaminated* manure and microorganism. Although the treatment of manure to decontaminate it for use as a fertilizer is known in the art and the use of microorganisms for composting or enhancing the quality of the soil for plant growth is also known, there is no teaching or fair suggestion or motivation to combine the two as applicant has done and obtained synergistic results as pointed out on page 16 at Experiment #4. The closest prior art is the patent to Mehta that teaches the combination of inorganic or organic fertilizer with beneficial microorganisms, but the reference is silent with regard to any manure, let alone decontaminated manure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. SAYALA whose telephone number is 571-272-1405.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.
